

Enhancing the Rail Corridor

The section of the Rail Corridor from Jln Kilang Barat to Spooner Road as well as six access points are closed for improvement works.

Why is this necessary?

This section has deteriorated due to wear and tear over the years. There are potholes and depressions that are safety hazards to users.

Enhancement works will strengthen the track's foundation and ensure long-term track integrity and durability for everyone's use.

When will the works be done?

First, enhancement works between Jln Kilang Barat to Henderson Rd is expected to be done by 31 July 2026. The Bukit Merah Central, Bukit Merah Bus Interchange and Henderson Rd access points will also be opened then.

Next, the section from Henderson Road to Spooner Road is expected to be completed by 31 Jul 2027. The Lower Delta Rd, Blk 138 Jalan Bukit Merah, Silat Ave access points will also be opened at that time.

Partial closure of the track during the enhancement period is not possible as the works are quite extensive with the existing track being removed and replaced.

Cracks on deteriorated trail

How can I still enjoy the Rail Corridor?

The remaining section of the Rail Corridor north of Jln Kilang Barat access point remains open for you to enjoy.

Alternatively, pedestrians and cyclists may use the alternative route along Jalan Bukit Merah to connect between Jalan Kilang Barat and the Southern end of the Corridor.
