

NOTICE

A section of the Rail Corridor (indicated in red) is closed for improvement works from 3 Nov 2025. The four access points (indicated in yellow) along this section are also closed. The works will be completed in phases.

**Please use the alternative route along
Jln Bukit Merah (indicated in green) to
continue along the Rail Corridor.**

Thank you for your understanding.

Enhancing the Rail Corridor

The section of the Rail Corridor from Jln Kilang Barat to Blk 138 Jln Bukit Merah as well as four access points are closed for improvement works.

Why is this necessary?

This section has deteriorated due to wear and tear over the years. There are potholes and depressions that are safety hazards to users.

Enhancement works will strengthen the track's foundation and ensure long-term track integrity and durability for everyone's use.

When will the works be done?

First, enhancement works between Jln Kilang Barat to Henderson Rd is expected to be done by 31 July 2026. The Bukit Merah Central, Bukit Merah Bus Interchange and Henderson Rd access points will also be opened then.

Next, the section from Henderson Road to Blk 138 Jalan Bukit Merah is expected to be completed by 31 Jul 2027. The Lower Delta Rd access point will also be opened at that time.

Partial closure of the track during the enhancement period is not possible as the works are quite extensive with the existing track being removed and replaced.

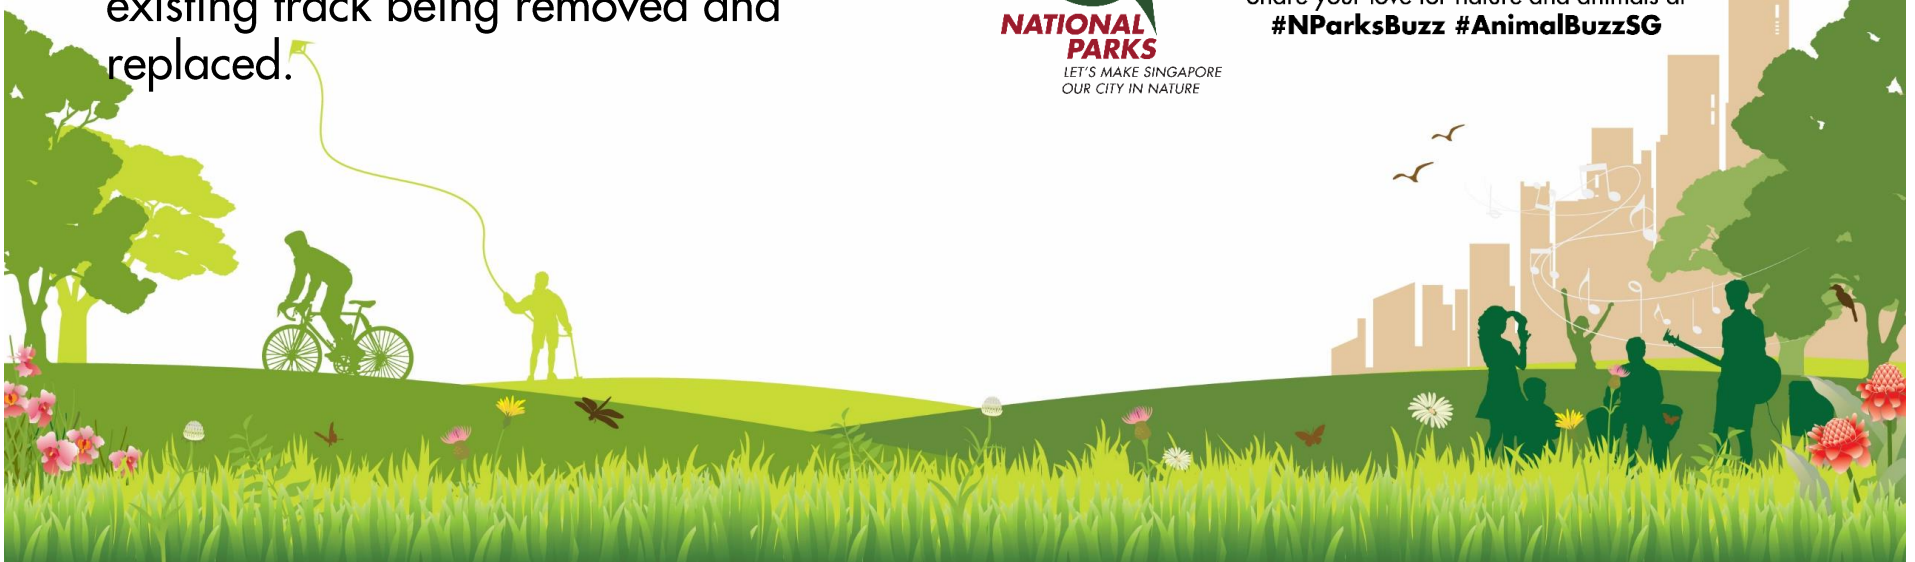

Cracks on deteriorated trail

How can I still enjoy the Rail Corridor?

To bypass this closed section, exit/enter the Rail Corridor via the Jln Kilang Barat and Blk 138 Jalan Bukit Merah access points.

Pedestrians and cyclists can use the alternative route on the footpath along Jalan Bukit Merah, before returning to the Rail Corridor to continue on your journey.
